PROFESSIONAL SUMMARY

Versatile, security-conscious **Full-Stack Systems Engineer** with proven experience developing and maintaining high-reliability enterprise platforms, public sector asset management systems, and AI-driven automation applications. Highly skilled in **Vue.js 3, Laravel 11/12 (Filament), SvelteKit, Flutter, Docker Swarm**, and **Python Computer Vision**, backed by an academic background in **Computer Science (Network Security) from UTM**, industry Cisco networking certifications, and hands-on Security Operations Center (SOC) threat defense experience at Tenaga Nasional Berhad (TNB).

WORK EXPERIENCE

Programmer / Full-Stack Enterprise Developer — YHCM Sdn Bhd — Apr 2026 – Present

Shah Alam, Selangor

- Maintain and upgrade mission-critical enterprise web systems for the public/government sector (including **eMesys**, **Sutera**, and **ADIMS**), complying with stringent data security, role-based access control (RBAC), and audit standards.
- Architect and build modular frontend interfaces using **Vue.js 3** and streamline administration workflows with **Laravel Filament**.
- Manage and optimize relational databases across **MySQL, MariaDB**, and **PostgreSQL 17** with indexing and schema enhancements.
- Deploy, monitor, and scale containerized services and image workflows using **Docker** and **Docker Swarm** across production nodes.
- Administer and harden hybrid server infrastructure across **Linux (Ubuntu)** and **Windows Server** environments, ensuring high availability.
- Resolve operational IT incidents, provide tier-2/3 technical support, and configure secure API integrations for organizational operations.

IT Support & Web Developer — Nova Bitara Development Sdn Bhd — Dec 2025 – Mar 2026

Sunway, Selangor

- Engineered and deployed a production **Collateralized Loan Application System (IWA001)** using **SvelteKit** and **Supabase** with Row Level Security (RLS) policies and JWT authentication, hosted on Vercel with GoDaddy DNS.
- Built a high-performance multilingual corporate portal (Infinity World) using **SvelteKit**, **Redis** caching, and Resend transactional email API.
- Developed and maintained a commercial e-commerce platform using **Laravel** and **MySQL**, hosted on DirectAdmin with IPserverone and Cloudflare WAF/CDN.
- Delivered comprehensive internal IT support, troubleshooting corporate hardware, operating systems, network connectivity, and DNS infrastructure.

Enterprise Mobility Solutions (Protégé) — Tenaga Nasional Berhad (TNB) — Apr 2025 – Dec 2025

UOA Business Park, Shah Alam

- Spearheaded full-stack development of **Onboardx**, an enterprise cross-platform onboarding application utilizing **Flutter (Dart)** and JavaScript.
- Engineered multi-database architecture supporting **Firebase Realtime DB, MongoDB, Supabase**, and **MySQL**.
- Configured and maintained Ubuntu cloud servers on **Microsoft Azure**, managing Network Security Groups (NSGs) and system resource monitoring.
- Automated build and delivery pipelines with **Jenkins CI/CD** and gained practical experience in container orchestration with **Kubernetes**.
- Designed intuitive user experiences and interface wireframes in **Figma**; resolved technical support tickets within strict SLA targets.

Cyber Security Threat Defense (Internship) — Tenaga Nasional Berhad (TNB) — Sept 2023 – Feb 2024

Platinum Bangsar, Kuala Lumpur

- Monitored enterprise network traffic and web access logs in real time using **Splunk SIEM** dashboards within an active SOC environment.
- Collaborated with the Red Team using **Vulhub** Docker laboratories to reproduce, test, and analyze known CVE vulnerabilities.
- Assisted the Blue Team in defense hardening, log audits, security patch verifications, and compliance alignment with ISO 27001 and NIST guidelines.

Information & Communication Technology (Internship) — Tenaga Nasional Berhad (TNB) — Dec 2019 – Feb 2020

Kota Bharu, Kelantan

- Mapped regional fiber optic route topologies using **Google Earth**; computed precision route distances and deployment costing models in Excel.
- Assisted network engineers with signal attenuation testing, physical infrastructure audits, and preventative maintenance.

FEATURED SYSTEMS & ENGINEERING PROJECTS

TINDAK — AI-Powered Mobile Action Engine | Flutter, Dart, Supabase RLS, Gemini AI — Live Demo • Portfolio

- Engineered an Android rapid-action utility capturing mobile Share Intents to parse URLs, contact numbers, and payment details locally.
- Designed a local-first regex/rule parser with Gemini AI fallback, coupled with a Supabase backend validated with strict RLS security policies.

9Router Office — Autonomous AI Agent 3D Workspace | Node.js 22+, Three.js, Model Context Protocol (MCP) — Live Demo • Portfolio

- Created an interactive 3D virtual workspace in Three.js where autonomous AI agents communicate in real time via Model Context Protocol (MCP).
- Integrated dynamic voice synthesis, agent state persistence, and end-to-end automated UI/API testing utilizing Playwright MCP.

Computer Vision & Win32 Desktop Automation Suite | Python, OpenCV, CustomTkinter, Win32 API — Case Study • Portfolio

- Built an advanced desktop automation suite utilizing multi-scale SIFT pyramid matching, CIELAB segmentation, and closed-loop visual servoing.
- Implemented dynamic OCR text extraction, native Win32 window safety boundaries, and a multithreaded CustomTkinter control GUI.

Baby Kicking Suite — Mobile Maternal Health Tracker | Flutter, Dart, Firebase Firestore & Functions — Mobile App • Portfolio

- Developed a cross-platform Flutter maternal wellness app enabling expectant mothers to record and track fetal movement patterns.
- Integrated Firebase Cloud Firestore real-time sync, movement irregularity alert analytics, and automated clinical PDF export for doctor visits.

Lumina Glass Studio & Smart Mirror Visualizer | SvelteKit, Tailwind CSS, Laravel 11 RESTful API — Web App • Portfolio

- Constructed an interactive LED smart mirror configurator featuring real-time Kelvin temperature (3000K–6500K) controls and texture shaders.
- Engineered a Laravel 11 RESTful backend with Eloquent models, Form Request validations, and 100% PHPUnit feature test coverage.

TECHNICAL SKILLS

Frontend & Mobile:	Vue.js 3, SvelteKit, Flutter (Dart), React.js, Tailwind CSS, HTML5, CSS3, JavaScript (ES6+), TypeScript, Three.js
Backend & APIs:	Laravel 11/12 (PHP 8.2+), Laravel Filament, Node.js, Python, RESTful APIs, C#, C++, Java
Databases & Cloud:	PostgreSQL (RLS), MySQL, MariaDB, Supabase, Firebase (Firestore & Realtime DB), MongoDB, Redis, Microsoft Azure, Vercel
DevOps & Security:	Docker, Docker Swarm, Jenkins, Kubernetes (Basic), Git / GitHub, Cloudflare WAF/CDN, DirectAdmin, Splunk SIEM, Wireshark, Vulhub, Firewall & VPN, ISO 27001, NIST
AI, Automation & Tools:	Model Context Protocol (MCP), OpenCV, Gemini AI, Playwright, Linux (Ubuntu, Kali), Windows Server, Figma, Microsoft Power BI

EDUCATION & CERTIFICATIONS

Bachelor of Computer Science (Network Security) — Universiti Teknologi Malaysia (UTM) — 2021 – 2024 | CGPA: 3.17

Johor Bahru, Johor

- **Final Year Project (FYP):** Geospatial Reporting Management System for UTM (SvelteKit, Tailwind CSS, Google Maps API, Supabase).
- **Relevant Coursework:** Ethical Hacking & Penetration Testing, Cybersecurity Governance & Compliance, Network Security.

Diploma in Computer Science — Universiti Teknologi Malaysia (UTM) — 2017 – 2020 | CGPA: 2.72

Kuala Lumpur

- **Final Year Project:** E-Commerce Web Platform with user authentication, catalog management, and payment flows (PHP, MySQL, Azure Ubuntu).
- **Relevant Coursework:** Object-Oriented Programming (C#), Structured Programming (C++), Java Programming.

Cisco Certifications: CCNAv7: Introduction to Networks • CCNAv7: Switching, Routing, and Wireless Essentials • Cisco DevNet Associate • Cisco Network Security • IoT Fundamentals: Connecting Things

Specialized Analytics: Microsoft Power BI Data Analysis (Jan 2025) • Python for Data Analysis (Dec 2024)

LANGUAGES

Malay: Native / Bilingual Proficiency • **English:** Professional Working Proficiency
