WORK EXPERIENCE

Programmer (Probation)

Apr 2026 – Present

YHCM Sdb Bhd, Shah Alam

- Maintain and support existing company systems and web applications to ensure smooth daily operations.
- Develop and enhance system features using **Vue.js** for frontend development and **Laravel Filament** for backend management.
- Manage and optimize databases including **MySQL** and **MariaDB**.
- Handle containerized application deployment and maintenance using **Docker**.
- Perform server administration, monitoring, troubleshooting, and maintenance for both Linux and Windows environments.
- Assist staff with technical issues, system configurations, and day-to-day IT operational support.
- Upgrade and improve existing systems based on operational and business requirements.

It Support

Dec 2025- Mac 2026

Nova Bitara Development Sdn Bhd, Sunway

- Provide comprehensive IT support to staff, troubleshooting hardware, software, and network issues.
- Developed and deployed a **company landing page** using **SvelteKit** (frontend/backend), **Redis** for caching, hosted on **Vercel** with domain management via **GoDaddy**.
- Built a **Collateralized Loan Application System** using **SvelteKit**, **Supabase** (database), hosted on **Vercel** with **GoDaddy** domain.
- Developed an **e-commerce platform** for product sales using **Laravel**, **MySQL** database, hosted on **DirectAdmin** with **IPserverone** domain and **Cloudflare** DNS management.
- Assist staff with technical issues, system configurations, and daily operational support.

Enterprise Moblity Solution (Protege)

Apr 2025 – Dec 2025

Tenaga Nasional Berhad (TNB), UOA Business Park, Shah Alam

- Full-stack development of web application Onboardx using Flutter (Dart/JavaScript), with databases: Firebase, MongoDB, Supabase, MySQL.
- Managed Ubuntu servers on Microsoft Azure; explored Jenkins for CI/CD and Kubernetes for orchestration.
- Designed UI/UX with Figma; handled support tickets ensuring timely resolution.

Cyber Security Threat Defense (Internship)

Sept 2023 - Feb 2024

(TNB) Platinum, Bangsar

- Monitored website activity via Splunk dashboard to detect anomalies.
- Collaborated with Red Team using Vulhub for vulnerability identification; worked with Blue Team to strengthen security posture.
- Updated internal system data and assisted with software installation.

Tenaga Nasional Berhad (TNB) Kota Bharu

- Designed fiber optic network routes using Google Earth; calculated distances and costing with Excel.
- Assisted in network infrastructure evaluation to improve connectivity and reduce signal loss.

SKILL

Excellent	: Microsoft Office Suite, System & Network Troubleshooting, IT Support.
Intermediate	: Frontend: Flutter (Dart), React.js, SvelteKit, HTML/CSS, JavaScript, Laravel Backend: Node.js (basic), PHP, C#, .NET, C++, Java Databases: MySQL, PostgreSQL, MongoDB, Firebase, Supabase, Redis DevOps & Cloud: Microsoft Azure (Ubuntu), Vercel, DirectAdmin, Cloudflare, Jenkins (basic), Kubernetes (basic), Networking & Security: Cisco Packet Tracer, Wireshark, VPN, Firewall Configuration, Splunk, Vulhub, Wireshark, AI Tools: Antigravity, Stitch, Cursor, Gemini Design & Tools: Figma, Git, Visual Studio Code.
Basic	: Network Security, Penetration Testing, Intrusion Detection, Windows Server, Ubuntu/Kali Linux, ISO 27001, NIST, Microsoft Power BI Data Analysis, Python For Data Analysis.

EDUCATION & CERTIFICATIONS

University Technology Malaysia (UTM) Johor.

2021 – 2024

1. **CCNAv7: Introduction to Networks**
 2. **CCNAv7: Switching, Routing, and Wireless Essentials**
 3. **IoT Fundamentals: Connecting Things**
 4. **Network Security**
 5. **DevNet Associate**
- Bachelor of Computer Science, Network Security. CGPA: 3.17
 - Final Year Project(FYP) an [Reporting Management System](#) for UTM.
 - Technical skills for front-end and back-end development: **SvelteKit** combined with **Tailwind.css** and Visual Studio Code, **Supabase** as Database, The **Google Maps API** supports location-based reporting, and **Figma** as UI design.
 - Relevant Courses:

Ethical Hacking & Penetration Testing	: Practical experience with Red Team tools and exploit frameworks.
Cybersecurity Governance & Compliance	: Understanding of ISO 27001, NIST, and security policy implementation.
Network Security	: Hands-on with firewall configuration, VPN, and intrusion detection systems.

University Technology Malaysia (UTM) Kuala Lumpur.

2017 - 2020

- Diploma in Computer Science. CGPA: 2.72
 - Final Year Project(FYP) an E-commerce platform ([Eshop](#)) with secure login, user registration, and payment features during Diploma.
 - Technical skills for front-end and back-end development: **Figma** as UI design, **MySQL** as Database, Microsoft Azure as server (Ubuntu)
 - Relevant Courses:

Object-Oriented Programming with C#	: Developed desktop applications with Windows Forms.
Structured Programming with C++	: Applied logic, loops, and functions in algorithm-based projects.
Java Programming	: Built basic Android and console applications.
-

PROGRAM

Microsoft Power Business Intelligence (BI) Data Analysis (online) **Jan, 2025**

Learned how to create interactive dashboards, analyze datasets, and visualize insights using Microsoft Power BI for informed decision-making.

Python for Data Analysis (online) **Dec, 2024**

Gained hands-on experience using Python libraries such as Pandas and NumPy to clean, analyze, and visualize data effectively.

LANGUAGES

Malay	: Native or Bilingual Proficiency
English	: Basic Proficiency
